### TO THE CLIENTS OF REFLEXOLOGY

#### What is Reflexology?

Reflexology is a natural, non-invasive, complementary therapy that treats the whole body through the stimulation of reflex points located on the feet. Reflexology works with the body's energy flow to assist its own natural healing process. By applying pressure to specific areas of the feet which correspond to all parts, glands and organs of the body, Reflexology stimulates nerve pathways and improves the flow of blood and lymphatic fluids, helping the body to restore and maintain balance. Reflexology is an effective preventative therapy for maintaining health and well being, as well as a way to assist in relieving a multitude of health challenges.

#### Can Reflexology cure disease?

Reflexology is a unique modality in the alternative health field which promotes better health and well-being. Reflexology allows the body, mind and emotions to relax, thereby helping achieve homeostasis. The body heals itself, guided by its own innate wisdom and processes, rather than by the reflexologist directing the healing process. Reflexology is not intended to replace conventional medical care.
